

AMENDMENTS TO THE CLAIMS

1-36. (Cancelled)

36. (New) An article for holding a surface relief, said article comprising:

a holding metal substrate,

a first layer of non-metallic material being held by the substrate, said first layer of non-metallic material being adapted to hold at least one surface relief, and

wherein the metal substrate holds a colour print layer.

37. (New) An article according to claim 36, wherein the colour print layer is positioned between the metal substrate and the first layer of non-metallic material.

38. (New) An article according to claim 36, wherein the first layer of non-metallic material is selected from the group consisting of lacquers, polymers, printing inks or any combination thereof.

39. (New) An article according to claim 36, further comprising a second layer, said second layer being substantially transparent and covering at least part of the first layer of non-metallic material.

40. (New) An article according to claim 39, wherein the second layer is selected from the group consisting of lacquers, polymers, laminated plastic, printing inks or any combination thereof.

41. (New) An article according to claim 39, wherein the refractive index of the first layer of non-metallic material and the second layer is different.

42. (New) An article according to claim 36, wherein the article forms an integrated part of a container.

43. (New) An article according to claim 36, wherein the container is a food container.

44. (New) An article according to claim 36, wherein the container is a beverage container.
